Emmanuel College  
Alan Wilson Research Fellowship  

Further Particulars

The Governing Body of Emmanuel College invites applications for a stipendiary Research Fellowship in Medical and Biological Sciences (Pharmacology, Physiology, Biochemistry, Chemistry, Pathology, Neuroscience and Chemical Engineering). The Fellowship will commence on October 1, 2019 and will be for a fixed term of three years.

Eligibility

This Fellowship is intended for researchers early in their careers: successful candidates are likely to be in the latter stages of their research leading to a PhD degree, or post-doctoral researchers who have been awarded their PhD degree after 1 October, 2017.

Fellowship details

The stipend for Research Fellows is related to the national academic scale. The current stipends are £24,507 (£32,237 if not resident in College) for post-doctoral Research Fellows and £23,012 (£30,741 if not resident in College) for pre-doctoral Research Fellows. Benefits for Fellows include grants for research expenses and academic travel, a book allowance, and assistance with computing facilities. Research Fellows will be given the option to live in College (Fellows’ sets are on the main College site and are generally limited in terms of size and facilities), and are entitled to lunch and dinner in Hall free of charge.

The Fellow will undertake an independent program of research. For laboratory projects, applicants must arrange a host laboratory in the Cambridge area before applying. It should be noted that research expenses from the College are limited.

There is no teaching requirement attached to the Fellowship, but Fellows are welcome to teach if they wish, and are permitted to receive additional remuneration for up to six hours College or University teaching a week.

Research Fellows are normally required to reside in Cambridge during Full Term. However, subject always to the permission of the Governing Body, Research Fellows may work away from Cambridge for up to three Terms during the last two years of their Fellowship.

Applications

Candidates should submit a CV, List of Published Work (including preprints and articles in press) a statement outlining their research plans (maximum 1,000 words) and a document that confirms eligibility as defined above (e.g. details of laboratory or research project). They should also arrange for three referees familiar with their research to submit letters of reference. The application and references should be sent by email to the Bursar with subject heading “Alan Wilson Research Fellowship” to bursar@emma.cam.ac.uk by no later than 5 pm on 15th April. Please note it is the candidate’s responsibility to ensure that references are submitted by the deadline.
