

INFORMATION TECHNOLOGY AT EMMANUEL COLLEGE

Student Facilities

Emmanuel has an excellent computer network that connects more than a thousand devices, used by Fellows, students and staff, to the University Network and Internet. All student rooms have wired access to the College computer network and most of the site is covered by wireless.

Students have access to three managed computer rooms in College; particularly useful for those without their own computer and for those needing access to specific teaching applications.

- **Robert Sansom Computer Room** provides 5 PCs, an iMac and a Multi-function device that scans, prints (both B&W and colour) and photocopies.
- **Emmanuel House Computer Room** has 4 PCs, an iMac and B&W laser printer.
- **Library Computer Room** has 5 PCs, an iMac and a B&W laser printer.

During term all of the rooms are available 24 hours a day, 7 days a week and require a registered University card to gain access (which is given to you when you arrive).

Please note that if you decide to bring your own printer, you will have to turn off its wireless capability and use a USB cable instead to print from your machine. Enabling the wireless on your printer can cause interference with the College's wireless network and an intermittent connection for you and your neighbours.

Connecting your Computer

You should be able to connect any computer running an up-to-date operating system to the network. This includes Windows 10/11, Apple MacOS and Linux. If you are unsure then please get in touch using the contact details below. Further details can be found at www.emma.cam.ac.uk/contact/students/is/connect/. If you are unable to access this page then contact us at the start of term; we will be holding an introductory talk during your first week.

If you have any questions then please e-mail is@emma.cam.ac.uk.

See you in October!
