

Computing at Emmanuel College

Student Facilities

Emmanuel has an excellent computer network that connects more than a thousand devices, used by Fellows, students and staff, to the University Network and Internet. All student rooms have wired access to the College computer network and most of the site is covered by wireless.

Students have access to three managed computer rooms in College; particularly useful for those without their own computer and for those needing access to specific teaching applications.

- **Robert Sansom Computer Room** provides 16 PCs, 2 iMacs, 2 scanners, 2 B&W laser printers and a colour laser printer.
- **Emmanuel House Computer Room** has 4 PCs, an iMac, a scanner and a B&W laser printer.
- **Library Computer Room** has 5 PCs, an iMac, a scanner and a B&W laser printer.

During term all of the rooms are available 24 hours a day, 7 days a week and require a registered University card to gain access (which is given to you when you arrive).

Connecting your Computer

You should be able to connect any computer running an up-to-date operating system to the network. This includes Windows 7/8/10, Apple MacOS X and Linux. If you are unsure then please get in touch using the contact details below. Further details can be found at www.emma.cam.ac.uk/contact/students/computing/connect. If you are unable to access this page then contact us at the start of term; we will be holding an introductory talk during your first week.

If you have any questions then please e-mail computer-office@emma.cam.ac.uk or telephone (01223) 334942 during normal office hours (weekdays, 9-5pm).

See you in October!
